## ACTORS

---

Read the text carefully. Identify the actors that are present in the text. Actors can be individuals, group of individuals, institutional bodies, organisations, or similar. Actors are all such entities explicitly mentioned in the article and relevant for the article narrative and/or the issue that is being covered.

Identify a maximum of four "main actors" in the article. NOTE: It may not always be necessary to code four main actors even if there are four or more actors present in the article at hand.
